

Landscape collage

A landscape is a type of artwork where nature is the most important thing. You can think about a place you know or imagine somewhere new.

Supplies

- Paper
- Pencil
- Markers
- Glue
- Scissors
- Anything else you have! (tissue paper, scrap book paper, pom poms, paper straws, wrapping paper)

Steps

1. Start with your background. Landscapes should have a foreground (the space closest to you), middle ground (the space between the foreground and background), and background (the space farthest away from you).
2. Add some details. Think about what kind of day you want to show (rainy or sunny). Think about the season you want to create. Is it the city or country? Have fun with it and use your imagination! But don't forget to make it all about nature.
3. Share your art with your family! Tell them all about what you made.

Fun tips: straws make for great flower stems. You can flatten them between your fingers so they will more easily be glued down. Add some texture to your art work with tissue paper. Tear or cut it into small squares then pinch it together before you glue the pieces down.

We love to see all your hard work. Share with the Frick your creations. You may even be growing your at home gallery. We would love to see it!
