04

01
If you are using plain paper, draw your design using many different colors.

02
Next, cut out the triangles. You will want at least 5 for a necklace.

03
Using a straw or pencil you can roll your beads. Start with the wide end wrapped around the pencil. Then place some glue on the paper all the way to the point. Roll up your paper. Repeat until you have enough beads.

04
Cut a piece of string. Add your beads to your string. If you have other beads at home you can add those too. Try making a pattern!

Be sure to share
you fun with us!

TIPS:
If you don't have any
patterned paper, try
using left over wrapping
paper. You can also print
the next page as a
template for the beads.
